

## CSUH Assessment Responsibilities

Assessment is not the sole responsibility of one office or one person but rather is a shared responsibility between administrators, faculty, and a variety of units. Assessment follows a coordinated model that emphasizes the importance of faculty and degree programs. A decentralize model embeds assessment in normal operating and decision-making processes in the university making it a standard way of doing business as opposed to an external top down requirement to be met.

Responsibility for assessment is shared within the university infrastructure as follows:

### Policy-Making

Provost  
Deans  
Academic Senate

### Coordination

Institutional Research and Assessment

### Faculty Training

Office of Faculty Development

### Assessment Plans (SLOs, Indicators, etc.)

College

### Data Collection

Departments  
Institutional Research and Assessment

### Actual Assessment

Departments (with support from College, Faculty Development, IRA)

### Use of Results

Departments and College  
CAPR and Academic Senate  
Provost

### External Reporting Requirements

Institutional Research and Assessment

### Institutional Portfolio (on web)

Institutional Research and Assessment
