

The MS in Kinesiology builds on the knowledge and skills from BS in Kinesiology programs. Entry into the MS requires that a core in Kinesiology has been achieved and any deficiencies are addressed before beginning the MS. As such, the fundamental concepts have already been introduced and the MS program develops and masters these. In terms of assessing the Program learning Outcomes, the classes that cover the different cognate disciplines (KIN 602 – 608) will be used on a rotating basis to assess relevant Program Learning Outcomes.

| PLOs  | R/E | Synthesize and apply multiple cognate disciplinary perspectives | Design and implement collaborative innovative professional applications | Make decisions using critical analysis of issues, theories, methods, ideas, and artifacts | Communicate persuasively using a contextually-grounded approach | Systematically reflect on the practice of social justice |
