Why Environmental Geosciences?

Our M.S. program is unique in the Bay Area in that many courses are offered in the evenings, and augmented by field experiences. We maintain strong connections with East Bay Regional Parks, the California Environmental Protection Agency, Lawrence Livermore National Laboratory, NASA Ames, the U.S. Geological Survey in Menlo Park, and SLAC National Accelerator Laboratory.

What track is right for you?

There are two tracks for completing the capstone requirement for the Environmental Geosciences M.S. program: a thesis track, requiring original research, a university thesis, and an oral defense, and a research track, with more course work and a research project. The program will prepare students who enter into either the professional or academic career track.

How to Apply

ADMISSION REQUIREMENTS

- Applicants must have a GPA of at least 2.75 in all undergraduate work.
- Any undergraduate core course with a "D" grade will have to be repeated.
- Students transferring from another graduate program must have a GPA of at least 3.0 in all graduate geology or environmental science courses. (No more than 12 units may be transferred.)

LETTERS OF RECOMMENDATION

Applications must be accompanied by two letters of recommendation from faculty members or work supervisors.
